To whom it may concern,  
This petition is in support of XM satellite radio's instant traffic and weather. I believe it is a great service that makes me aware of traffic and weather when ever I would like to know as opposed to what for the set time on the local radios. More over XM radio station for traffic and weather barely has any commercials making an instant report on the traffic and weather. It makes my life a lot easier while I am commuting an hour each way to my work. Prohibiting XM satellite radio from trasmitting instant traffic and weather reports at the behest of local radio stations would be a total travesty. More over I believe it would be against the principals what we stand for --freedom of speech!
